Security & Client Centric

Industry Best Practices

The Dinocrates Group is a Maryland based boutique strategy & technology advisory firm delivering services on a national scale and is successful through partnering with our public and private sectors clients to identify their highest-value opportunities, address their most critical challenges, and transform their enterprises.

We are unique as it is one of only a few consultancies that can deliver the same high-quality delivery, advisory, and innovation of a global management consulting firm with a small business designation. We recruit and retain senior advisors that provide:

- ▶ Significant breadth of operations & technology expertise
- ▶ Industry thought leadership and presentation of technically complex concepts simple & straightforward
- ▶ Focus on driving incremental results and successes with reduced “consultant speak” and “vapid PowerPoints”

Since our inception in 2014, Dinocrates has provided advisory services on over 25 prime /sub contracts with over 47 SOW's across the Country.
