## CORE COMPETENCIES FOR TODAY'S BUSINESS CHALLENGE

Today, businesses are finding it increasingly difficult to maintain secure, reliable and effective IT infrastructures and stable, clear strategies in a rapidly evolving business landscape. These challenges are driven by global factors, social media impacts, the pervasive IOT (internet of things) and the dynamic nature of how modern business is conducted. These and others factors have substantial consequences that can derail a strategic plan and affect a business' bottom line.

### WHAT WE DO

We offer two solutions to address and overcome today's emerging business challenges. First, our CIO Advisory Services deliver a full range of strategic services to provide clear and reliable long-term guidance. Second, our "Cyber SWAT Team" focuses on the more urgent and tactical issues that can confronted by any business.

### CIO ADVISORY SERVICES

Dinocrates has built a senior team of experienced IT and business professionals that are equipped and prepared to assist any size organization in addressing business challenges. Our CIO Advisory Services deliver expertise that covers a broad range of technologies, providing end-to-end capabilities that cover the range of CIO / CTO / CISO / CPO challenges – from defining IT strategy and managing the business / system architecture, to measuring and maximizing IT value, performance and compliance.
